

DISCLOSURE INFORMATION

Declaration of Disclosure and Conflicts of Interest

It is the policy of AACE to ensure balance, independence, objectivity, and scientific rigor in all of its CME activities. Presentation content may include discussion of an unlabeled use of a commercial product or an investigational use of a product not yet approved for any purpose. AACE requires that participating faculty disclose to the audience any product(s) and its use(s) discussed in the educational activity that are unapproved/unlabeled for the use by the FDA or still considered investigational in nature.

Everyone who is in a position to control the content of an educational activity must disclose all relevant financial relationships. "Relevant financial relationships" are financial relationships in any amount occurring within the past 12 months that create a conflict of interest. AACE requires speakers, faculty, CME Committee, and other individuals who are in a position to control the content of this educational activity to disclose any real or apparent conflict of interest they may have as related to the content of this activity. All identified conflicts of interest are thoroughly evaluated by AACE for fair balance, scientific objectivity of studies mentioned in the presentation, and educational materials used as basis for content, and appropriateness of patient care recommendations.

The intent of this disclosure is not to prevent a speaker with commercial affiliations from presenting, but rather to provide learners with information from which they may make their own judgments. Informed learners are the final safeguards in assuring that a CME activity is independent from commercial influence.

AACE has reviewed all disclosures and resolved or managed all identified conflicts of interest for this educational activity, as applicable.

	Commercial Interest	What Was Received	For What Role
Lynette Nieman, MD, FACP	1. HRA Pharma	1. Royalties	1. Invention

Nothing to Disclose

Karel Pacak, MD, PhD, DSc, FACE

Amir H. Hamrahian, MD, FACE
